

## Where to Add Chemicals to Your Hot Tub

1. Unlock your hot tub cover straps and fully open the spa cover.

4. Carefully measure the recommended amount of granular or liquid spa chemicals.

2. Depending on your hot tub model, open the spa filter lid or basket.

5. Pour the hot tub chemicals into the water above the filter.

3. Using the hot tub control panel, start the clean cycle.

7. After the ten minutes, return the hot tub filter lid or basket, close the cover and lock the straps.
